\* *These courses will provide delegates with the skills and knowledge to carry out effective risk assessments and to develop management programmes for the relevant subject of the course. Further experience gained in delegates' own workplaces will result in competency in the relevant topic. To assist in gaining confidence in a chosen speciality INVC can offer an "accompanied assessment" whereby part or all of a site is assessed by an experienced consultant in conjunction with the newly-qualified "competent person".*

*Refresher (update) courses are currently offered for occupational noise assessment courses and are recommended after about a year's experience following the original course. These are currently offered at West Anglia Training Association and IOSH. Courses will be offered at INVC's head office – details will be available during the year or contact us directly.*

Contact details for the above training organisations are given below:
